

About AlzBetter

A revolutionary approach to caring for people with Alzheimer's and other forms of dementia at home.

How the Patent Pending AlzBetter program works:

People with dementia deserve better care. With the right training, tools and management, they can live happy, safe, meaningful lives at home.

A care manager who is a certified dementia specialist comes to the home and utilizes custom software to do an in depth dementia assessment.

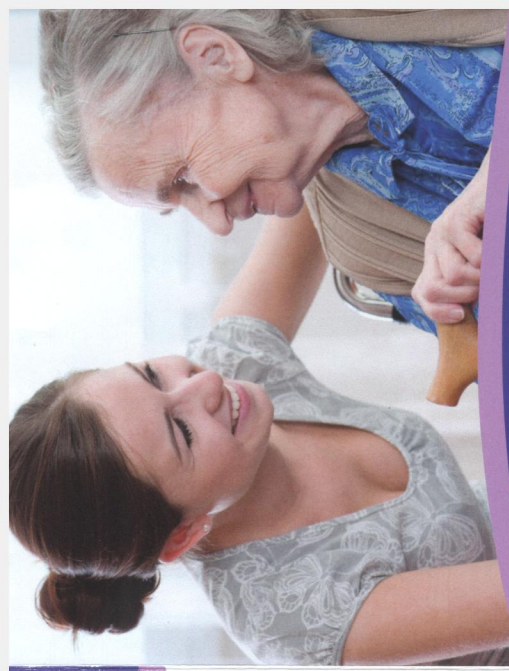

Proprietary algorithms then determine client's current level of dementia and identify problematic areas.

Software creates a daily schedule which includes tasks and activities that create a meaningful and enjoyable day. All activities are based on person's personal interests and appropriate for current level of dementia.

Caregiver with advanced dementia training is hand selected to provide care for clients and receives individualized instruction from care manager on an ongoing basis.

Regular follow-up visits are performed by care manager to re-assess current level of dementia and make changes to activities according to results. Additionally, Quality Of Life assessment is performed at each visit to determine the success of the program and resolve problems.

Family and other caregivers receive education and personalized training from care manager using our Care Manual and Custom Videos.

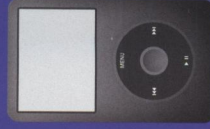

Special Activities Include:

Proprietary books written specifically for people with dementia which match their current ability level.

Custom puzzles using their own family pictures which match their current ability level.

Free enrollment in our Music To Remember program which includes complimentary iPod loaded with their favorite songs as well as portable speaker.

Testimonial

"Life had become so stressful for my mother and me trying to care for dad. She was getting so run down that I was truly concerned for her health. With his agitation and wandering, we really did not think he was manageable at home, but when we learned about the AlzBetter At Home program, we figured we had nothing to lose.

To this day we are amazed at how well he is doing. The staff really took an interest in both my mom and dad and created activities specifically tailored to him and I love to see the smile on his face."

Mary D. - Moorestown NJ

This one-of-a-kind specialty program is the result of more than twenty years caring for seniors with dementia and hundreds of hours working with the industry's most forward thinking experts.
